ID - Elements and Principles of Design: Color Trends (NS) - Submission

Description

Instructional Strategies:

Internet Article/Project

Objective: The student will create a color palette board for a master bedroom using trending colors.

Note: Before class, review color trends of this year from the Benjamin Moore or House Beautiful websites by searching “color trends.” Choose a bold or unusual color. This color will be used to spark an initial class discussion before showing students the trending colors.

Ask students the question, “What is your impression of the color (insert chosen color here)?”

Have a student volunteer write the comments on the white board or overhead display for students to view.

Display and discuss with students this year’s color trends from Benjamin Moore and House Beautiful.

Questions for Discussion:

What is your impression of this year’s color trends? Why?

What are some different ways the trendy colors might be used? (As accent colors, full room colors, on furniture, or accessories, etc.)

If a client had used a great deal of gray last year, how might the new color trends be incorporated?

Have students create a color palette board containing color swatches for a master bedroom using one of this year’s trend colors as the background color.

Instruct students to include swatches for the walls, flooring, window treatment, and accessories, such as the pillows, bed linens, or comforter.

Instruct students to present color board to the class for peer review.
